Thaw did not look very well to-day. He has lost most of the Indian tan he carried away from Matteawan and is not so heavy by several pounds. The campaign of publicity to which he treated Canada is being duplicated here for the benefit of New Hampshire. The new campaign is keeping below here.

POUGHKEEPSIN, Sept. 19.—The Dutchess County Grand Jury has refused to indict Harry K. Thaw for conspiracy in connection with his escape from the Matteawan Hospital. The reason is that should Thaw be brought back and tried the county would be responsible for all the costs of prosecution, including the salary and expenses of William Travers Jerone, who was sent to Canada as Special Assistant Attorney-General in the Thaw case.

Thousands of copies of a printed circular containing parts of sermons in which favorable reference was made to Thaw are to be distributed over the State.

The circular also contains Thaw's favorite piece of reading matter, the speech of William Travera Jerome, in which the former District Attorney declared Thaw sane.

It is said that a well organized lobby is bringing pressure to bear on Gov. Felker in the hope that he may consent to give Thaw his liberty in this State. If this is true, it is impossible to get authentic confirmation of it. The Governor himself is at present out of town.

Officials of the Department of Health felt pleted returns showed that only ten new cases of typhoid fever had been reported from the East Side district affected by the recent outbreak. Mrs. Philip Hoehn, whose husband has Mrs. Philip ricenn, whose nuscand has a delicatessen store at 77 Broome street, died of the disease at the Post-Graduate Hospital Thursday night. She and her husband and their four children, none of nussand and their four children, none of whom is more than 12 years old, were stricken one after another and removed immediately to the hospital a few days ago. Inquiry among their neighbors brought information that there were no other cases of typhoid in that block.

Records of Cases and Deaths.

A comparison of the figures of this year with those of last bears out the contention of the Department of Health that typhoid fever is being gradually eliminated from this city through the adoption of stringent measures for examining milk and food supplies.

For the week ended September 13 this year there were 36 cases reported from Brooklyn. For the same period last year the number was 52. The preceding week 31 cases were reported. A year ago the number was 46. During the week ended August 9 this year only eight cases were reported, whereas during that week in 1912 the number was 81. Under ordinary circumstances there are more cases during that week in 1912 the number was 81.

An Open Letter to Men

On Clothes; Something of Which Most Men Know Little-Though They Have Good Taste and High Standards

If it seems odd to you that we should have to say more than

Topcoats from London and suits made in America are ready in the Wanamaker Men's Store for Autumn and Winter

it will enlighten you to know that there are as many kinds of clothes in the New York shops as there are fish in the sea; yet there seems to be but one way of describing them all-each is best.

We are content to describe Wanamaker clothes as different. Which is true.

Take the cloth: Out of thousands of patterns, we carefully choose a few over a hundred-nothing extreme; out of all sorts of hybrid mixtures, only all-wool or silkand-wool. Somebody gets the rest; we don't.

The cut: You've no idea of the study which precedes it-observations and conferences in London and New York, examination of designs, talks with club men and leaders in men's fashions. The best judgment decides the Wanamaker cut, which may be set down as absolutely correct.

The tailoring: The best, wherever our suits are made. In some houses the Wanamaker shops are set up to do-under strict supervision-the special work we insist upon.

The work of six months told in less than six minutes.

We need not be quite so modest about these, since they were made in London, and come to us with the approval of the best authorities on men's fabrics. We bring them over because we simply cannot get anything like them made here. \$30 to \$55.

They are mixtures in which the changes are tunefully rung on all the colors in the spectrum; some single, some double breasted; some belted and box back; some belted and inverted pleat back; some with ragian sleeves; some cuffed; all reaching to just below the knee.

The rapidity with which the present epidemic spread through the East Side may indicate the presence of typhoid carriers. It was pointed out yesterday, however, that the policeman now ill at Hellevue can hardly be supposed to be such a carrier.
